### January-2021

### B.B.A., Sem.-V

### CC-307: Advanced Financial Management

Time: 2 Hours]

Max. Marks: 50

Instructions :

- (1) All Questions in Section carry equal marks.
- (2) Attempt any two questions in Section I.
- (3) Question 5 in Section II is COMPULSORY.

#### SECTION-I

1. (A) Compute the cost of capital in following cases:

10

- (a) A ten year, 14% debenture of ₹ 100 redeemable at par with 5% floatation cost.
- (b) An ordinary share selling at a current market price of ₹ 60, and paying a current dividend of ₹ 3 per share, which is expected to grow at a rate of 7%.
- (B) XYZ Ltd. has the following book value capital structure:

11

	(₹ Crore)
Equity Capital (in shares of ₹10 each, fully paid up-at par)	15
12% Preference Capital (in shares of ₹ 100 each, fully paid up-at par)	1
Retain Earnings	20
11.5% Debentures (of ₹ 100 each)	10
11% Term Loans	12.5

The next expected dividend on equity shares per share is ₹ 3.60, the dividend per share is expected to grow at the rate of 7%. The market price per share is ₹ 40.

Preserence stock, redeemable after ten years, is currently selling at ₹ 75 per share.

Debentures, redeemable after six years, are selling at ₹ 80 per debenture.

The income-tax rate for the company is 40%.

Calculate the Weighted Average Cost of Capital by using Book Value Weights.

2.		A bond has 3 years remaining until maturity. It has a par value of ₹ 1,000. The coupon interest rate on the bond is 10%. Compute the Yield to Maturity at current market price of (a) ₹ 1,100, (b) ₹ 1,000 and (c) ₹ 900, assuming interest is paid annually.	10
	(B)	(1) A company's current price of share is ₹ 60 and current dividend per share is ₹ 4. If its capitalization rate is 12%, what is the dividend growth rate?	10
		(2) Mr. Parth has invested in XYZ Chemicals. The capitalization rate of the company is 15% and the current dividend is ₹ 2.00 per share. Calculate the value of the company's equity share if the company is slowly sinking with an annual decline rate of 5% in the dividend.	
			10
3.	(A)	Define Derivatives. Explain the difference between Futures and Options.	10
	(B)	Explain Certainty Equivalent Approach.	10
		. CDividend Explain the factors affecting dividend policy	
4.	(A)	Discuss the meaning of Dividend. Explain the factors affecting dividend policy of a company.	10 10
	(B)	Discuss the Walter's Model of dividend policy.	10
		SECTION - II	
			10
5.	Do a	as directed (Attempt any 10 out of 20):  risk. (unavoidable, avoidable,	
	(1)	Systematic risk is also killed	
	(2)	Capital Asset Pricing Theory asserts that portfolio returns are best explained by (Diversification, Economic factors, Systematic risk, Specific risk)	
	(3)	Opportunity cost is also known as cost. (Economics, Implicit, Marginal,	
	(4)	Explicit)  The cost of perpetual debt capital if interest rate is 15% and tax rate is 40% is (10%, 9%, 15%, 11%)	
	(5)	There is no cost for internally generated funds. (True/False)	
	(5) (6)	required rate of return expected by investors.	
		Minimum, FIXCU, Variable	
	(7)	For a bond Yield to Maturity is always equal to Coupon Rate. (True/False)	
	(8)	(Premium, Par value, Discount).	;
	(9)	The section of bond is only dependent on the interest payments. (True/False)	
	(10		
		(True/False)	
1	D-114	P.1	r.o.

(11) Zero	coupon bonds are always issued at discount. (True/False)
	us the term used for reducing risk by using derivatives. (Waiving voking/Hedging)
	price of a commodity or financial asset for immediate delivery is known as (Forward, Spot, Future, Options)
	put option, the buyer gets right to buy an asset at a particular price ue/False)
	ture contracts are standardized in terms of amount or quantity as the case may (True/False)
(16) On	aly seller is obligated to perform in case of Options. (True/False)
(17) Ac	ecording to Walter's dividend model, optimum dividend payout ratio in case of owing firms is 100%. (True / False)
	ock dividend is also termed as (Cash dividend, Interim dividend, onus shares, Regular dividend)
(19) Di	ividend can paid out of capital. (True / False)
	& M model is also called dividend model. (regulatory, irrelevance, elevance)
